

Talent ID: 73649

Title: Fertility Nurse Coordinator

Location: Charleston, USA

Summary

BSN educated Registered Nurse with extensive experience coordinating care for patients undergoing fertility treatments. Critical thinker with strong interpersonal skills, capable of implementing nursing interventions and collaborating with an interdisciplinary team. Proven ability to manage a high volume of patients in a fast-paced, remote environment. Passionate about supporting patients throughout their fertility journey, dedicated to providing exceptional care at every stage.

Professional Experience

Fertility Nurse Coordinator

Fertility Clinic, USA

- Educated patients on infertility diagnostic evaluations, treatment protocols, procedures, and medications.
- Coordinated treatment plans for ovulation induction, IUI, IVF, embryo transfers, and egg freezing.
- Addressed patient queries regarding consent forms, cycle management, timing, pharmacy logistics, and medication training.
- Monitored pregnancies through ultrasounds, bloodwork, and hormonal supplementation until 10 weeks gestation.
- Acted as a liaison between clinical staff, financial personnel, and wellness support teams (e.g., social workers, acupuncturists).
- Managed patient care across multiple states, utilizing various communication channels, including phone, email, and emergency call lines.

Labor and Delivery Registered Nurse

Healthcare System, USA

- Developed and implemented care plans for laboring patients, overseeing their labor, delivery, and recovery.
- Provided care in high-risk ante/intra/postpartum settings and managed OB triage and pre/intra/post-operative care.
- Collaborated with healthcare teams, including doctors, nurses, and social workers, to provide quality care.

- Identified and intervened for pregnancy complications such as pre-eclampsia, gestational diabetes, and preterm labor.
- Served in charge nurse role, overseeing floor management and orienting new staff members.
- Administered lifesaving treatment to newborns as needed.
- Delivered patient education and emotional support to mothers and families, especially during critical moments such as cesarean sections or preterm evaluations.
- Proficient in computerized charting and documentation systems.

Labor and Delivery Registered Nurse

Medical Center, USA

- Monitored mothers during labor and postpartum, ensuring the safety of both mother and fetus through various assessments.
- Offered emotional support to mothers and families, especially in stressful situations like cesarean sections and neonatal testing.

Labor and Delivery Nurse Intern

Medical Center, USA

- Provided direct care to laboring mothers, including monitoring and evaluating to promote healthy deliveries.
- Monitored fetal heart rate for abnormalities and documented data accurately using the EPIC system.
- Collaborated with the healthcare team to assess, plan, and manage care for optimal patient outcomes.
